

## **Introduction to Web Design**

Websites are becoming a part of everyday life, this taster session shows you how to create a simple website and upload the information to the web.

If there is sufficient demand a follow on course will be run showing you how to create and maintain your own website. This course will be run by our own webmaster Jon, who has created and maintains the community website [www.westparkcommunity.co.uk](http://www.westparkcommunity.co.uk).

This taster session requires a level of computer knowledge, including file management, internet usage and knowledge of word processing packages.
